

RELECTRIC

Circuit Breaker Testing Services

RELECTRIC'S Features:

- Tests meet NEMA/NETA Standards
- Results Checked Against Historical Data
- Digital Equipment, Accurate to .01 Amps
- Test Results are Tracked by Barcode
- Results Always Visible on the Web

RELECTRIC's
Digital Tester

Look for this Barcode!

The number on it links back to your online test reports - it means **you're safe.**

RELECTRIC's Tests:

- Contact Resistance** Megger DLRO600 (less than 50% variability per pole)
- Load Injection Test** - Phenix HC-12C - (300% of rated current; ramp-up to trip - within mfr TCC)
- Operational Test** (break current at rated amps; operate five times, no load)
- Insulation Resistance Test** - Fluke 1507 (phase-phase, phase-ground - one minute each)
